DAYTON, Ohio, February 3, 1971 --- The Technical Institute at the University of Dayton will become the Engineering Technology Division of the School of Engineering next September, Rev. Charles J. Lees, S.M., Provost, announced today. Mr. James McGraw, who has been Director of the Technical Institute, will become the Associate Dean for Engineering Technology.

The change is in line with the upgrading of the engineering technology curriculum over the past five years at the University. Until five years ago, Technical Institute students could only receive a two-year associate degree. At that time the bachelor of technology degree was inaugurated and the curriculum was continually strengthened in keeping with the changes taking place in the engineering profession. No longer does the word, "technician," really apply to the technology graduate.
